

## Assignment

Using this API <https://developers.themoviedb.org/3/movies/get-movie-details>

Create a movie app that looks something like this

<https://dribbble.com/shots/4790880-Movie-App-Desktop/attachments/10597622?mode=media>

Use the following technologies:

- React
- Axios / Fetch to get data from the API
- Redux to manage state
- React-router
